

# OCEAN 360 OFFSHORE

**Marine Surveyors, Consultants and Ship Operators,  
Professional and academic training. Maritime  
Management..**

## Who are we?

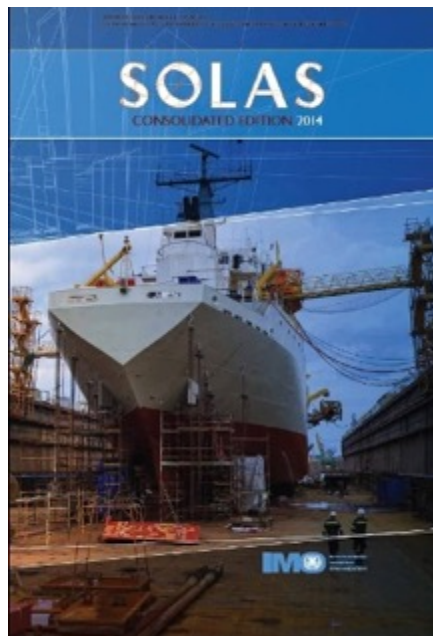

OCEAN 360 OFFSHORE, makes available to you all its knowledge and experience in the maritime sector, with our specialized personnel in Marine Surveys and equipment (tools, parts and spares), management, handling, training and maritime consulting. This is all possible thanks to a team filled with experts that include Master Mariners, Chief Engineers, Maritime Engineers, Naval Inspectors, professors and coaches; who are all certified by various universities and the International Maritime Organization (IMO) itself in order to create academic programmes of their own. We also count with others Engineers.

## What do we do?

We offer consulting and support services in order to improve the personal and the organizational performance by any actions in different areas.

Our objective is to give all our international experience and work into individualized schemes, in order to be able to guide, protect and safeguard the interests of our clients, therefore minimizing operating risks and adding value to their businesses.

## **Ship Inspections Management:**

Our Marine Surveyors take care of load and “Flags” inspections. The supervision of loading and discharge operations. Inspections of container loads, refrigerated containers and cargoes and damaged containers. Inspections for bulk cargoes and project cargoes, and draft surveys. Ocean 360 also performs pre-purchase, full conditions and hull inspections, valuations, loss adjustment expenses (LAE) for all our clients.

## **Maritime Tools, Equipment, Parts and Spares Management:**

We can provide genuine gear directly from the fabricator as well as high-quality spare parts. Due to the many relationships we've established with manufacturers and business partners all over the world, we can stock and supply practically any part you may require. Every part we supply has been tested in the field and satisfied our customers for years.

## **Maritime Consulting Management:**

We assess our clients on many different specialized fields, such as:

- Project management.
  - ISPS & ISM code Audits
  - Ballast Water Management project and audits
  - Organizational evaluation and diagnosis.
  - Change management process.
  - Strategic planning.
  - Key Performance Indicator (KPI) development.
  - Organizational design.
  - Business expansion plan.
  - Risk Assessment.
  - Design and evaluation of internal control procedures.
  - Budget formulation, preparation and management.
  - SISEINOP (Venezuelan security system for port operations) design and implementation.
  - Design, construction and management of sport marinas
- Creation of internal policies manuals.
  - Management control.
  - Job and performance profiling.
  - Department design and development.
  - Administrative and management audits.
  - Policy development for management coaching and organizational leadership. Risk management.
  - Logistics management.
  - ISO 9000 quality standards.
  - Security Diagnostics of ports and terminals.
  - Master planning.

## **Operations Management:**

The companies that work in this sector do so in a heavily regulated environment, and must face challenges such as multi-brand businesses, global logistics, resource optimization, project and investment management, and project control.

That's why we offer complete and integrated solutions that cover the value chain for all new constructions, modifications and operations, which include engineering support and management systems for documentation, projects, constructions, operations, logistics, finance, maintenance and human resources.

## **Training Management:**

Designing teaching strategies and processes:

Curriculum design for:

Marine technical courses (non-IMO).

Undergraduate, graduate and post-graduate degrees in Merchant Marine and related careers.

Providing a full list of professors and coaches.
